

BLOSSOM

Basic competences as literacy, numeracy & digital skills focused on business development

About the project

The BLOSSOM project is a co-funded project by the European Union under Erasmus+ framework, carried out by a consortium of five countries organizations, Spain (Innohub), Poland (CWEP), Cyprus (Growth), Romania (CPIP) and Greece (AKADIMOS). The project concentrates on the creation of tools for the cultivation of business literacy, digital and numerical skills for low-skilled women.

Last Transnational Partnership Meeting

The last Transnational Partnership meeting was held on 7-8 November 2023 in Romania! This meeting was key with the partners analyzing in detail the progress of tasks and drew the final steps to conclude this project successfully.

Progress of the project

In the last month partners have been working on the finalization of the following project results:

E-learning digital Platform which provides an online space for low-skilled adult women to encourage lifelong learning and foster the development of competences & learn on business literacy, numeracy, and digital skills

Self- Assessment Tool for BLOSSOM which tests your numeracy, literacy and digital skills with regards to business development and provides you with a written summary of your strengths and weaknesses

Current status

All project partners are working closely together to pilot and test the results of the project and finalize them for their official release to the public.

Next steps

In January 2024 the last month of the project the Multiplier Events will take place, to share the results of the project and reinforce their use, thus supporting women to acquire or improve business literacy, numeracy and digital skills,

Please stay tuned for the upcoming new results and follow us on <https://www.facebook.com/BlossomErasmusPlusProject/>
